TEMPO+ 6-HOUR G/T UPDATE APPLICATION AND REFLECTION GUIDE

SUMMARIZE YOUR LEARNING

List the videos, articles, or resources you chose or were assigned to you to complete your learning.

Summarize your learning. What were your biggest takeaways from the learning?

How has what you learned changed what you thought or knew about gifted and advanced education?

APPLY YOUR LEARNING

Describe a current teaching method, administrative method, or advanced learning service model you use on a daily basis. How can you use what you have learned in your course to modify this?

How did your learning increase your understanding of gifted and advanced students? How do you plan to apply this increased understanding to your classroom and instruction?

Before you create a plan of action around your learning, what considerations do you need to think about? What resources do you need? Who do you need to work with? Whose buy-in will you need?

Develop an action plan or lesson plan that implements at least one of the strategies, tools, or techniques learned from the videos and articles within your classroom or school. The action plan should include expected student outcomes, instructional activities aligned to standards/curricula, and evaluation strategies. Share this action plan or lesson plan with your administrator.
